

# Giving psychosis a voice

2

A one-day conference

hosted by Suffolk Mental Health Partnership NHS Trust

Thursday  
8 March 2012  
09:30 – 17:00  
Dunston Hall  
Norwich  
NR14 8PQ

Understanding the experiences that have come to be called psychosis can allow people the opportunity to talk about them in relation to their lives.

Following on from our hugely successful international conference in 2010, where we explored how finding meaning in psychosis could be a fundamental way of challenging stigma, we invite you to join us for this exciting second event.

Themes for the 2012 event include; managing distress, trauma, recovery, formulation, latest research regarding psychosis and working with people's creativity. A range of speakers with a wealth of personal and professional experience will encourage us to take a step forward in our work, to consider how to find meaning in what people are experiencing, thinking, feeling and doing.

## speakers
